PANDEMIC RESPONSE

Patients of the Free Clinic have been hit especially hard by the COVID pandemic. Like every other health care organization, the clinic had to make dramatic changes to protocols and services to respond. From new screening and outreach procedures, to complex case management challenges and coordination for testing and treatment options, the team at the clinic has worked tirelessly since the initial outbreak to make sure that our patients are as safe as possible. Nevertheless, many of the people we serve have been sickened, have lost wages or job opportunities, or had to care for loved ones through extended illnesses. Low-income families in Rappahannock and Fauquier Counties have been hit very hard.

The Free Clinic is a testing site for COVID and is making arrangements to get vaccines to our patients as quickly as possible. We have worked directly with employers to help in safe return to work for infected patients. The community as a whole has responded by providing housing, food security, hospital care, motel stays, utility bills, and whatever else is needed to get through this. We are fortunate to live and work in a place where people pull together and pitch in. We are expecting and planning for a brighter 2021!

PANDEMIC RESPONSE

1

Moved some primary care visits to a safe new tele-health platform

2

Connected patients to testing and diagnostic options in-house and in the community

3

Worked with our local health officials to implement safe practices and PPE solutions

4

Created a “wellness check” station for all clinic patients and guests

5

Provided at-home diagnostic tools (e.g. blood pressure monitors, pulse oximeters, thermometers)

6

Provided curbside prescription pickup and even home delivery of medications as needed

7

Worked with Fauquier Health and outpatient specialists for advanced treatment options when necessary

8

Joined statewide pandemic response efforts for dental, medical, and mental health care

Every dollar donated to the **Fauquier Free Clinic** generates over \$6.00 in health care services essential for our community.

THE JOURNEY OF YOUR DOLLAR

- 46% MEDICAL + PHARMACY
- 26% DENTAL + HYGIENE
- 17% MENTAL HEALTH SERVICES
- 9% ADMINISTRATION + OVERSIGHT
- 2% BUILDING AND UTILITY

TONY'S STORY

Tony called the Free Clinic to make an appointment after weeks of fatigue, shortness of breath, and occasional chest pain. He knew something was wrong, but he had no health insurance and "I didn't want a bunch of bills I couldn't afford to pay." Our doctor detected a heart arrhythmia on that first visit and we connected him with a local cardiologist later the same day. Tony also had a months-old wound that just wouldn't heal. A biopsy performed by a local surgeon led to a cancer diagnosis, and a successful surgical removal of the lesion.

Our clinical team acted quickly. Our local specialists and our local hospital donated their time to get Tony the treatment he needed. A Free Clinic volunteer helped him enroll in Medicaid, which now pays for his heart medicine and his other health care needs going forward. Tony is doing his part, taking his medication, communicating with his doctors, and following the plan.

We meet patients like Tony every week, local citizens who are worried about the financial cost of their health. There are many of them. Thanks to our generous community, we can do something to help.

LOOKING FORWARD

Making essential healthcare services more accessible to all is our on-going mission. We are continuously striving to grow and improve our quality of care.

COMPREHENSIVE CARE

We will continue to provide coordinated medical, dental and mental health care to those who need it.

GUIDANCE

We will provide our patients with the resources, tools and information they need to lead healthier lives and holistically improve their well-being.

NUTRITION

Recognizing nutrition is a crucial component of health, we have implemented a new fruit and veggie prescription program for our patients who are at high-risk for developing diabetes.
